

# SharePoint Advantage Program

A flexible framework of options  
that reduce the time, cost and risk  
of deploying and managing SharePoint

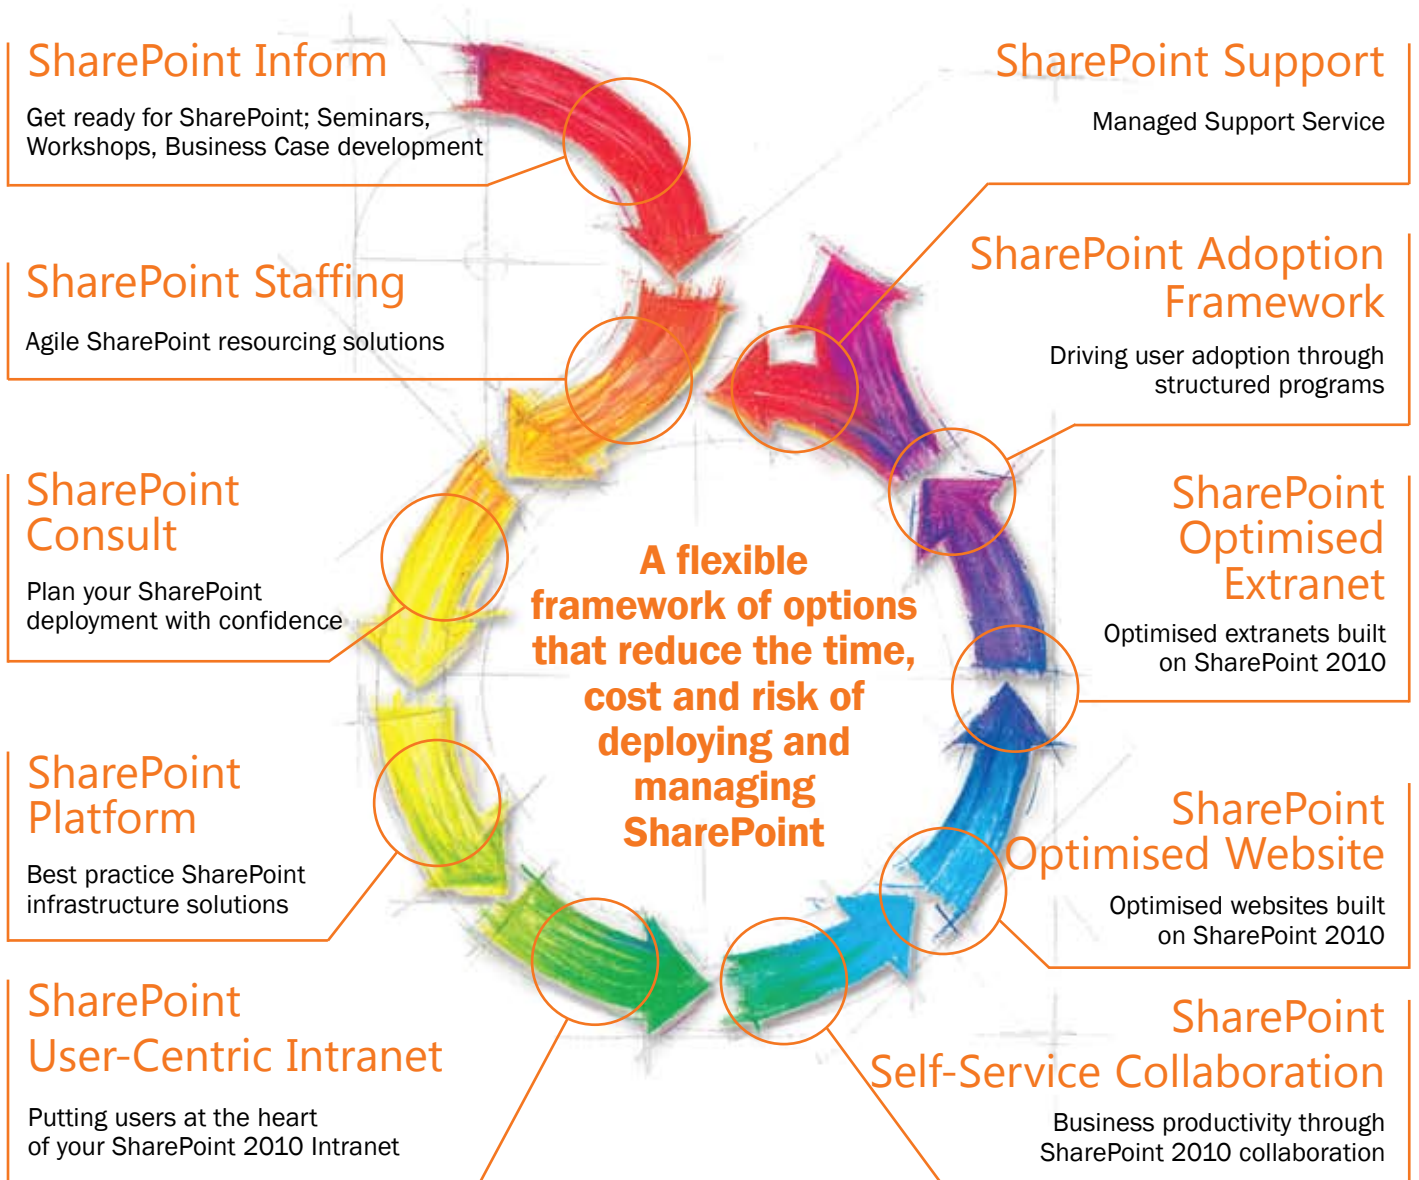

# The SharePoint Advantage Program

The SharePoint Advantage Program from ICS Solutions is a flexible framework of options that has been proven in organisations of all sizes and all market sectors to reduce the time, risk and cost of designing, developing, deploying and managing complex, customised SharePoint solutions.

ICS Solutions have been a Microsoft Gold Partner for over 15 years. With around 175 successful SharePoint engagements, access to over 500 SharePoint experts, 1,800 people through SharePoint 2010 trials, and over 6,000 clients educated through SharePoint seminars - ICS Solutions have earned their reputation as the leading UK Microsoft SharePoint Partner.

**ICS Solutions. The UK's leading SharePoint partner.**

# A flexible suite of 10 options that ensure your SharePoint success

## ► SharePoint Inform

We deliver more free SharePoint education through our seminars than any other UK partner. Our SharePoint workshop focuses on your specific challenge and identifies the solution, while our business case service helps you justify the investment.

## ► SharePoint Staffing

With 24/7 global resourcing support and exclusive access to our DreamTeam portal – offering the largest pool of SharePoint experts in the UK for both contract and permanent assignments – we take the pain out of your Microsoft recruitment needs.

## ► SharePoint Consult

Our Microsoft SharePoint Deployment and Planning and Business Value Services are a suite of Microsoft-designed offerings providing all the support you need to plan your SharePoint deployment with confidence. In addition, ICS Solutions can meet all your consulting needs to implement SharePoint successfully.

## ► SharePoint Platform

Ensure that your SharePoint environment provides a secure and scalable platform for your mission critical applications. Flexible packages address every aspect of your deployment, including: capacity planning, server farm design, installation and configuration, back up, maintenance and disaster recovery plans and SQL Server clustering or mirroring.

## ► SharePoint User-Centric Intranet

ICS Solutions SharePoint User Centric Intranet service puts end user productivity, collaboration and enterprise social networking at the heart of the Intranet through a trio of user focused tools to drive adoption and business return – SharePoint 2010 My Sites, enhanced search and fully integrated social networking.

## ► SharePoint Self-Service Collaboration

The Collaboration service provides users with easy access to SharePoint's powerful collaboration features, allowing end users to build and tailor new collaboration sites with the help of options and templates. ICS implementation methodology provides a framework to assist in the discovery and implementation of the collaboration capability, suited to both the user and the business.

## ► SharePoint Optimised Website

The SharePoint Optimised Website service uses SharePoint 2010 for Internet sites, and ICS Solutions best practice experience to help you create rich and visually compelling sites whilst substantially reducing site maintenance costs. The Optimised Website allows you to manage centrally single or multiple sites, have a fully integrated mobile, multi-lingual, search engine optimised, and accessible site with creative and interactive media technologies and social networking integration.

## ► SharePoint Optimised Extranet

The SharePoint Optimised Extranet service uses SharePoint 2010 for Extranet sites, and ICS Solutions best practice experience, to help you create rich and visually compelling sites whilst substantially reducing site maintenance costs. Backend connectivity is fully supported through a range of integration technologies.

## ► SharePoint Adoption Framework

The SharePoint Adoption Framework is aimed at organisations who have implemented SharePoint and wish to realise greater value through wider adoption. The Framework uses a structured combination of consulting, training and mentoring to help business managers and users extract the maximum business return from their Microsoft SharePoint investment.

## ► SharePoint Support

Our SharePoint Support offering provides up to 3rd line support and expertise for your SharePoint platform and solutions, including: on and off site consultancy, application and platform element support, a dedicated Technical Account Manager, extensive Escalation options including Microsoft Certified Consultants and remote access monitoring and fault resolution.
